The U.S. Department of Homeland Security issued the following news release:

The U.S. Department of Homeland Security (DHS) announced today that it has begun collecting additional **fingerprints** from **international visitors** arriving at Boston Logan **International** Airport (Logan). The change is part of the department's upgrade from two- to 10-**fingerprint** collection to enhance security and facilitate legitimate travel by more accurately and efficiently establishing and verifying **visitors'** identities.

"Biometrics have revolutionized our ability to prevent dangerous people from entering the United States since 2004. Our upgrade to 10 **fingerprint** collection builds on our success, enabling us to focus more attention on stopping potential security risks," US VISIT Director Robert Mocny said.

For more than four years, U.S. Department of State (DOS) consular officers and U.S. Customs and Border Protection (CBP) officers have been collecting biometrics--digital **fingerprints** and a photograph--from all non-U.S. citizens between the ages of 14 and 79, with some exceptions, when they apply for visas or arrive at U.S. ports of entry.

"Quite simply, this change gives our officers a more accurate idea of who is in front of them. For legitimate **visitors**, the process becomes more efficient and their identities are better protected from theft. For those who may pose a risk, we will have greater insight into who they are," added Mr. Paul Morris, Executive Director of Admissibility Requirements and Migration Control, Office of Field Operations, U.S. Customs and Border Protection.

The department's US-VISIT program currently checks a **visitor's fingerprints** against DHS records of immigration violators and Federal Bureau of Investigations (FBI) records of criminals and known or suspected terrorists. Checking biometrics against the watch list helps officers make visa determinations and admissibility decisions. Collecting 10 **fingerprints** also improves **fingerprint** matching accuracy and the department's ability to compare a **visitor's fingerprints** against latent **fingerprints** collected by Department of Defense (DOD) and the FBI from known and unknown terrorists all over the world. Additionally, **visitors' fingerprints** are checked against the FBI's Criminal Master File.

On an average day at Logan, almost 2,000 **international visitors** complete US VISIT biometric procedures. **Visitors** from United Kingdom, Ireland, Germany and France comprise the largest numbers of **international visitors** arriving at Logan.

Logan is the next port of entry to begin collecting 10 **fingerprints** from **international visitors**. Washington Dulles **International** Airport began 10-**fingerprint** collection on November 29, 2007, and Hartsfield Jackson Atlanta

DEPARTMENT OF HOMELAND SECURITY BEGINS COLLECTING 10 FINGERPRINTS FROM INTERNATIONAL VISITORS AT BOSTON LOGAN INTERNATIONAL AIRPORT

International Airport began 10-**fingerprint** collection on January 6, 2008. Seven other ports of entry will soon begin collecting additional **fingerprints**. The next ports scheduled are: Chicago O'Hare **International** Airport; San Francisco **International** Airport; George Bush Houston Intercontinental Airport; Miami **International** Airport; Detroit Metropolitan Wayne County Airport; Orlando **International** Airport; and New York's John F. Kennedy **International** Airport. The remaining air, sea and land ports will transition to collecting 10 **fingerprints** by the end of 2008.

Since US VISIT began in 2004, DHS has used biometric identifiers to prevent the use of fraudulent documents, protect **visitors** from identity theft, and stop thousands of criminals and immigration violators from entering the country. US VISIT, in cooperation with CBP, is leading the transition to a 10-**fingerprint** collection standard. This upgrade is the result of an interagency partnership among DHS, FBI, DOD and DOS.
